Professional Summary

Computer Science undergraduate and **published AI researcher** at the Islamic University of Madinah, on a **fully funded merit scholarship**. Co-Author of **four peer-reviewed conference papers** (ICBDT 2025, Bahrain). Hands-on experience building production **AI automation agents** using **n8n**, **Google Gemini API**, **PyTorch**, and **TensorFlow**; Completed **AI/ML Engineering** internship at DevelopersHub Corporation, delivering multimodal predictive systems and medical diagnostic models, alongside a **Machine Learning** internship at Arch Technologies. Proficient in Python, Java, Node.js, SQL, and C++; strong command of deep learning, NLP, large language models (LLMs), retrieval augmented generation (RAG), and full stack web development. Trilingual communicator (English, Arabic, Urdu) with proven leadership in high pressure, large scale operational environments.

Education

Bachelor of Science in Computer Science | *Islamic University of Madinah* *Expected May 2027*
Madinah, Saudi Arabia

- **CGPA:** 4.34 / 5.00 **Honour:** Fully funded merit scholarship - competitive national selection
- **Concentrations:** Object Oriented Software Development; Algorithm Design & Analysis
- **Coursework:** Artificial Intelligence, Computing in Java, Object Oriented Programming, Statistics & Applications, Algorithms & Complexity, Discrete Mathematics

Professional Experience

Machine Learning Intern | *Arch Technologies* *Jul 2026 - Aug 2026*
Remote

- Engineered high-impact **feature extraction and selection workflows**, handling high-dimensional data and mitigating target leakage across partitions
- Optimized predictive performance through systematic **hyperparameter tuning** and cross-validation, improving validation F1-score and reducing inference latency
- Containerized and deployed trained models as **RESTful API endpoints**, establishing automated tracking and evaluation benchmarks

AI Engineering Intern | *DevelopersHub Corporation* *Apr 2026 - May 2026*
Remote

- Developed **multimodal predictive systems** using Scikit learn and TensorFlow across structured and time-series datasets
- Engineered a **short-term stock price forecasting engine** with LSTM based deep learning and regression ensembles
- Built a **heart disease diagnostic classifier** through feature engineering, model selection, and hyperparameter tuning
- Delivered production ready ML pipelines in an Agile/remote environment with continuous model evaluation and iteration

Electrical Technician | *Cotton Web Limited* *Sep 2022 - Mar 2023*
Lahore, Pakistan

- Diagnosed and repaired electronic control boards, sensors, and PLC/HMI modules using multimeters and tone testers with **90%+ fault detection accuracy**
- Executed preventive maintenance on **60+ industrial machines**, improving overall system efficiency by **19.28%**
- Read and interpreted electrical schematics, wiring diagrams, and technical manuals; gained hands-on PLC programming and HMI automation experience

Mathematics & Science Tutor | *Kamran Science Academy* *Nov 2021 - Oct 2022*
Lahore, Pakistan

- Delivered one-on-one and small-group tutoring to **25-30 students**, improving performance by **25-35%** on assessments
- Conducted **3-5 sessions per week** (60-90 min each) with customised lesson plans targeting individual learning gaps

Leadership & Volunteering

Hotel Induction Team Lead - Hajj Season 2026 | *Pakistan Hajj Mission Madinah.* *Apr 2026 - May 2026*
Madinah, Saudi Arabia

- **Led a team of volunteers** responsible for receiving, orienting, and inducting Hajj pilgrims across hotel properties in Madinah during the peak season
- Coordinated room allocation, check in logistics, and daily operational briefings for groups of **100+ international pilgrims** from Pakistan
- Delivered **multilingual orientation sessions** (English, Arabic, Urdu) covering safety protocols, transportation schedules, and on site services

- Managed real-time problem resolution - rooming conflicts, mobility assistance requests, and emergency escalations - demonstrating **crisis leadership** and operational decision-making under pressure

Pilgrim Guide & Translator | *Masjid Al-Nabawi - IU Madinah Volunteer Programme* *Ramadan 2024 & 2025*
Madinah, Saudi Arabia

- Provided real time navigation, multilingual communication, and logistics coordination for international pilgrims during high-capacity religious events at Masjid Al Nabawi
- Demonstrated cultural sensitivity, crisis communication, and on ground operational problem solving at global scale

Publications — Conference Proceedings, ICBDT2025, Bahrain, Nov 2025

AgHealth+: An Agentic AI Enabled IoT Healthcare Framework for Integrated and Privacy Aware Recommendations. *International Conference on Business and Digital Technology (ICBDT2025)*

Agentic AI Framework for Individuals with Disabilities and Neurodivergence: A Multi Agent System for Healthy Eating, Daily Routines, and Inclusive Well Being. *ICBDT2025*

Agentic AI Framework for Smart Inventory Replenishment. *ICBDT2025*

Agentic AI Framework for Cloudburst Prediction and Coordinated Response. *ICBDT2025*

Projects

Scholarship AI Agent *n8n · Google Gemini API · Google Sheets · Web Scraping · Mar 2026*

- Designed and deployed an end-to-end autonomous agent that scrapes scholarship websites, extracts structured data via **Gemini LLM prompting**, and auto-populates a live Google Sheets database with no manual intervention
- Demonstrates agentic workflow design, prompt engineering, LLM API integration, and automated data pipelines

LinkedIn AI Content Agent *n8n · Google Gemini API · Tavily Search API · Mar 2026*

- Built a fully autonomous content pipeline: agent retrieves live web data via **Tavily**, synthesises insights with **Gemini**, and publishes structured LinkedIn posts automatically
- Applied multi step **agent orchestration**, retrieval augmented generation (RAG), and REST API chaining within n8n

Certifications & Training

- **Introduction to Artificial Intelligence** - KAUST Academy, Jan 2026 *(ML Foundations, ML Algorithms, Deep Learning, Unsupervised Learning)*
- **Certificate of Appreciation - Research Presentation** — ICBDT2025, Bahrain, Nov 2025
- **Probability & Statistics for ML & Data Science** - DeepLearning.AI / Coursera, Nov 2025
- **Linear Algebra for Machine Learning and Data Science** — DeepLearning.AI / Coursera, Nov 2025
- **Calculus for Machine Learning and Data Science** - DeepLearning.AI / Coursera, Nov 2025
- **Using Symbolic AI and Open Data** - IU Madinah, Feb 2025
- **New Horizons in Software Engineering: DevOps, Microservices, AI** - IU Madinah, Feb 2025
- **Python Basics** & **Python Functions, Files and Dictionaries** - University of Michigan / Coursera, Dec 2024 - Jan 2025
- **Applied Electrical Technician** - Descon Technical Institute, Lahore, Oct 2022

Technical Skills

Programming Languages	Python, Java (OOP), JavaScript, HTML5/CSS3, SQL, C++
AI & Machine Learning	Agentic AI, Multi-Agent Systems, Large Language Models (LLMs), Deep Learning, Natural Language Processing (NLP), Supervised & Unsupervised Learning, PyTorch, TensorFlow, Scikit-learn
Data Science	Pandas, NumPy, Matplotlib, Feature Engineering, Statistical Modelling, Exploratory Data Analysis (EDA)
AI Automation & Tools	n8n Workflow Automation, Google Gemini API, Tavily Search API, LLM API Integration, Prompt Engineering, Retrieval Augmented Generation (RAG)
Web & Backend Dev	Node.js, REST APIs, SQLite, Full Stack Development, Agile / Scrum
DevOps & Cloud	Linux (CLI), Git / GitHub, LaTeX, Docker (basics), Microsoft Azure (basics)
Industrial / Hardware	PLC Programming, HMI Automation, TIA portal siemens, Electrical Schematics, Sensor Diagnostics
Productivity	Microsoft Excel, LaTeX Studio, VS Code
Operating Systems	Linux, macOS, Windows
Languages (Human)	English (Fluent), Arabic (Intermediate), Urdu (Native)
